EDUCATION

College of Engineering Roorkee (COER)

B.Tech in Information Technology

Roorkee, Uttarakhand

2022 – 2026

Vanasthali Public School

Senior Secondary (Class XII)

New Delhi

2021 – 2023

PROFESSIONAL EXPERIENCE

Nexaiit

Backend Developer

Remote

2025

- Designed and optimized database schemas, improving query performance and data management. Integrated frontend applications with backend APIs and ensured secure data exchange.
- Tested, debugged, and fixed backend issues while collaborating with the development team using Git. .

Freelancer.in

Web Developer (Contract)

Remote

2024 – present

- Designed and delivered multiple client websites on a contract basis, including e-commerce jewelry storefronts for **2 clients** with product catalogs, payment integration, and responsive UI.
- Managed end-to-end project scope from requirements gathering to deployment, ensuring on-time delivery and client satisfaction.

PROJECTS

Real Estate Market Analyzer | *Python, Pandas, BeautifulSoup, Streamlit, SQLite* | [Streamlit Cloud](#)

- Engineered an end-to-end data pipeline scraping **10,000+** live property listings; cleaned, normalized, and stored data in SQLite for time-series analysis.
- Built an interactive Streamlit dashboard with statistical analysis of price trends by neighborhood, affordability metrics, and market patterns, including drill-down filters by location, price range, and property type.
- Performed exploratory data analysis (EDA) identifying seasonal trends and price correlations; surfaced **3+** actionable insights for real estate decision-making.

Aghorify | *E-commerce, Payment Gateway, WhatsApp Automation* | [Live Site](#) | [GitHub](#)

- Built a modern, responsive, SEO-friendly e-commerce platform with conversion-focused design.
- Integrated payment gateway and WhatsApp automation for order handling and customer communication.
- Deployed and managed using Hostinger VPS and modern deployment workflows.

EduReach – Offline Multilingual AI Education Platform | *Python, RAG, FastAPI, ChromaDB, OpenAI* | [GitHub](#)

- Built a RAG pipeline with ChromaDB and Sentence Transformers supporting PDF ingestion, semantic chunking, and source citations.
- Integrated multilingual support for **5+** Indian languages using the IndicTrans2 translation pipeline.
- Implemented a dual LLM provider setup (OpenAI / Ollama) with automatic offline fallback.

Player Re-identification and Tracking System | *Python, YOLO, OpenCV, DeepSORT* | [GitHub](#)

- Built a player re-identification and tracking system for sports videos using computer vision techniques.
- Leveraged YOLO for object detection and Deep SORT for multi-object tracking across video frames.

Annsetu – Surplus Resource Redistribution Platform | *Python, Flask, PostgreSQL, REST APIs*

- Built a full-stack platform connecting corporates, NGOs, and volunteers using a Flask REST API, PostgreSQL, and JWT authentication.
- Implemented dual-layer multilingual support for **7** Indian languages, combining static JSON i18n files with a Google Translate API fallback for user-generated content.
- Built a real-time donation lifecycle tracker (pending → accepted → in transit → delivered) with volunteer task assignment, paginated list endpoints, and a live /api/stats counter.

TECHNICAL SKILLS

Languages: Python, C, SQL, JavaScript

AI & Data: CNN, RNN, RAG, OpenAI API, Pandas, NumPy, Open CV, scikit-learn, TensorFlow

Backend: Django, Flask, RESTful APIs, JWT

Frontend: React.js, HTML5, CSS3

Databases: PostgreSQL, MySQL

Web Scraping: BeautifulSoup

Cloud & Tools: AWS, Hostinger VPS, Git, GitHub, Postman

CERTIFICATIONS & ACHIEVEMENTS

- Ultimate job ready data science – Code with Harry (2025)
- Secured **Rs. 80,000+** in sponsorships while leading the Fest Team at COER University.
